Education

Vellore Institute of Technology (VIT) — Vellore, Tamil Nadu, India
Integrated M.Tech in Software Engineering (CGPA: 8.91/10) — *2023 – 2028 (Expected)*

- **Specialization**: Software Engineering, Computer Science fundamentals, Object-Oriented Programming (OOP), and Data Structures.

Narayana Junior College — Anantapur, Andhra Pradesh, India
Intermediate (Class XII) – MPC (Board of Intermediate Education, AP) — *Sep 2021 – Mar 2023*

- **Performance**: Secured a score of **97.30%**.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, C/C++, SQL, Bash
Frontend & Web: Next.js 16/15, React 19/18, Tailwind CSS, Vite, HTML5, CSS3, WebSockets, Context API
Backend & Cloud: FastAPI, Node.js, Express, Supabase (PostgreSQL / RLS), Prisma, Docker, SSE, REST APIs
AI & Machine Learning: Gemini API (Multimodal), Whisper AI, Scikit-learn, Autoencoders, TreeSHAP, Pandas, NumPy
DevTools & Testing: Git, GitHub Actions, Octokit, Web Crypto API, Vitest, Playwright, Pytest, Manifest V3, Linux

Experience

InAmigos Foundation (IAF) — India
Web Development Intern (1 Month) — *Jun 2026 – Jul 2026*

- Audited live website UI/UX workflows, suggesting structural usability and layout improvements.
- Designed page redesign mockups in Figma and collected structured data across partner NGOs.

Thiranex — India
Full-Stack Web Development Intern (1 Month) — *May 2026 – Jun 2026*

- Completed project-driven full-stack internship, delivering assigned milestones in React and Node.js.
- Built and hosted full-stack applications including an e-commerce platform and live portfolio.

Projects

RoundsAI – Inpatient Oncology Ward Copilot | GitHub | Live Demo ↗ — *Health-a-thon 2026*
Next.js 15, FastAPI, Python, Whisper AI, Gemini 2.5 Flash, Supabase, TypeScript

- Built on-device Whisper (`faster-whisper base-int8`) transcription with 120+ oncology phonetic normalizer; zero cloud audio egress, $0 per-minute cost vs. cloud ASR APIs.
- Integrated Gemini 2.5 Flash multimodal vision OCR for paper lab reports; automated CTCAE v5.0 myelosuppression grading and febrile neutropenia sentinels.
- Architected real-time bedside-to-desktop live sync via Server-Sent Events (SSE); validated with 134 automated tests (pytest + TypeScript).

PRPilot – Autonomous AI GitHub App for Code Review | GitHub — *Production GitHub App*
Next.js 16, React 19, Supabase, Gemini 3.8 Flash, Octokit, TypeScript, Vitest, Playwright

- Developed production GitHub App using Octokit and Gemini API to auto-review pull requests, detect security vulnerabilities, and post structured inline comments with risk scores.
- Engineered HMAC-SHA256 webhook verification, Supabase RLS on all tables, and Zod-validated AI output to prevent prompt injection and XSS vulnerabilities.
- Implemented hybrid serverless architecture (Vercel waitUntil with GitHub Actions cron fallback) with atomic Postgres rate limiting and Vitest/Playwright E2E suites.

Smart Autofill Assistant – Privacy-First Browser Extension | GitHub | Edge Store ↗ — *Published Product*
TypeScript, Chromium Manifest V3, Web Crypto API, Chrome Extensions API

- Built and published Chromium Manifest V3 extension to Microsoft Edge Addons store; automatically detects online forms and fills fields securely on user request.
- Engineered local AES-GCM encrypted vault using Web Crypto API with zero cloud egress; strictly blocked sensitive inputs (passwords, OTPs, financial fields).
- Integrated optional semantic field matching under strict Content Security Policy (CSP), eliminating remote code execution vectors.

Honors & Certifications

- **Health-a-thon 2026**: Inpatient Oncology AI Copilot
- **Smart India Hackathon 2026**: MoES / IMD AI
- **Published Product**: Smart Autofill on Edge Store
- **GitHub Copilot Agent Mode** (Microsoft, 2026)
- **AWS Cloud Practitioner Essentials** (AWS, 2026)
- **Java Spring Boot Certification** (Infosys, 2026)
- **Software Engineering Job Sim** (JPMorgan, 2026)
- **GenAI Data Analytics Simulation** (Tata, 2026)
